

Wire Dereeler

For 1 Spool

LW-ZU-110

For 2 Spools

LW-ZU-114

For 4 Spools

LW-ZU-117

The dereelers are sturdy welded steel constructions for heavy flat wire spools. All of them have hydraulic disc brake systems and each spool has its own brake with a separate control. The brake control is by pneumatic regulation unit. The open shaft allows a simple and quick load and unload of spools. The dereeler are optional also sideward moveable available. Further a vertical and horizontal positioning of the spool can be offered for the single spool dereeler.

No. of Spools	Spool Ø	Spool weight	Sideward Moveable	Spool position Horizontal / Vertical
1	1000 mm	350 kg	Optional	Standard / Option
2	1000 mm	each 350 kg	Optional	Standard / Option
4	1000 mm	each 350 kg	Optional	Standard / Option
